LIST OF CONTENTS FOR VOLUME 25, 1998

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1998 Volume 25, Number 1 January

Contents

D. Yan and S.S. Cha	1	Practical common-path interferometry for real-time thermal/fluid flow measurements
Y. Li and C.-W. Park	9	Prediction of mass transfer rate in fibrous and granular media using packing permeability
S.F. Benjamin and C.A. Roberts	19	Warm up of automotive catalyst substrates: Comparison of measurements with predictions
G. Polidori, M. Lachi and J. Padet	33	Unsteady convective heat transfer on a semi-infinite flat surface impulsively heated
T. Aicher and W.K. Kim	43	Experimental investigation of the influence of the cross flow in the nozzle region on the shell-side heat transfer in double-pipe heat exchangers
P. Venkateswarlu and P. Gopalakrishna	59	A simplified method for correlating mass transfer data in electrochemical cells
C.W. Leung and H.J. Kang	67	Convective heat transfer from simulated air-cooled printed-circuit board assembly on horizontal or vertical orientation
R. Kumar, H.K. Varma, B. Mohanty and K.N. Agrawal	81	Augmentation of outside tube heat transfer coefficient during condensation of steam over horizontal copper tubes
D.C. Erickson, A. Gomezplata and R.A. Papar	93	Use of the Colburn-Drew equations to model mass transfer
H.A. Abdel-Aal	99	Error bounds of variable conductivity temperature estimates in frictionally heated contacts
J. Drchalová and R. Černý	109	Non-steady-state methods for determining the moisture diffusivity of porous materials
S. Wongwises	117	Effect of inclination angles and upper end conditions on the countercurrent flow limitation in straight circular pipes
S. Theerakulpisut and S. Priprem	127	Modeling cooling coils
D.A. Tarzia	139	The determination of unknown thermal coefficients through phase change process with temperature-dependent thermal conductivity
	149	Announcement

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1998 Volume 25, Number 2 February

Contents

X. Fu, R. Viskanta and J.P. Gore	151	Prediction of effective thermal conductivity of cellular ceramics
U.S. Rohatgi and R.B. Duffey	161	Stability, DNB, and CHF in natural circulation two-phase flow
A.A. Wragg, G. Batting and J. Krysa	175	Free convective mass transfer at down-facing horizontal surfaces with free or collared edges
P.K. Bansal and G. Xie	183	A unified empirical correlation for evaporation of water at low air velocities
S. Syrjälä	191	Laminar flow of viscoelastic fluids in rectangular ducts with heat transfer: A finite element analysis
L.P. Chua, C.Y. Liu and W.K. Chan	205	Measurements of a step cylinder
X.C. Guo and T.S. Zhao	217	A parametric study of an indirect evaporative air cooler
Y.-M. Lee and Y.-M. Kuo	227	Laminar flow in annuli ducts with constant wall temperature
F.S. Costa	237	Effects of differential diffusion on unsteady diffusion flames
A. Erek and Z. Ilken	245	Correlations for planar solidification of some phase change materials
I. Pop and T.-Y. Na	251	Darcian mixed convection along slender vertical cylinders with variable surface heat flux embedded in a porous medium
I. Pop and B. Yan	261	Forced convection flow past a circular cylinder and a sphere in a Darcian fluid at large Peclet numbers
A.J. Chamkha	269	Hydromagnetic plane and axisymmetric flow near a stagnation point with heat generation
A.J. Chamkha	279	Particulate viscous effects on the compressible boundary-layer two-phase flow over a flat plate
A. Raptis	289	Radiation and free convection flow through a porous medium

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1998 Volume 25, Number 3 April

Contents

A.H.H. Ali, K. Kishinami, Y. Hanaoka and J. Suzuki	297	Experimental study of laminar flow forced-convection heat transfer in air flowing through offset plates heated by radiation heat flux
J. El-Hajal, A. Ould El Moctar and H. Peerhossaini	309	Convection mixte dans un écoulement de poiseuille vertical: Étude comparative de chauffage volumique et pariétal à flux constant
M.R. Malin	321	Turbulent pipe flow of Herschel-Bulkley fluids
H.C. de Lange, C.J. Hogendoorn and A.A. van Steenhoven	331	The similarity of turbulent spots in subsonic boundary layers
C. Park, D.-H. Hwang, S.H. Chang W.-P. Baek	339	An improved physical model for flooding limited CHF under zero and very low flow conditions
T. Bali	349	Modelling of heat transfer and fluid flow for decaying swirl flow in a circular pipe
R. Kahraman, H.D. Zughbi, Y.N. Al-Nassar, M.A. Hastaoglu and N. Sobh	359	A simplified numerical model for melting of ice with natural convection
S. Wongwises	369	Interfacial friction factors in countercurrent stratified two-phase flow in a nearly-horizontal circular pipe
Y.-T. Lin, M.-S. Shieh, H.-D. Liou and C.-S. Hou	379	Investigation on the mass entrainment of an acoustically controlled elliptic jet
N. Onur and M.K. Aktaş	389	An experimental study on the effect of opposing wall on natural convection along an inclined hot plate facing downward
B. Doytcheva, A. Nikolova, G. Peev and D. Todorova	399	Mass transfer from a single grain to a fluid in an inert fixed bed
L. Nastac	407	On the validity of the quasi-steady state equation for heat or mass transfer problems with an axially moving boundary
A.J. Chamkha	417	Hydromagnetic mixed convection stagnation flow with suction and blowing
K.A. Yih	427	Heat source/sink effect on MHD mixed convection in stagnation flow on a vertical permeable plate in porous media
G.H. Sedahmed, M.S.E. Abdo, M. Amer and G. Abd El-Latif	443	Mass transfer at a pipe inlet zone in relation to impingement corrosion
	453	Announcement

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1998 Volume 25, Number 4 May

Contents

S.A. Sherif and R.H. Pletcher	455	Measurements of the thermal characteristics of a cooled jet discharged into a heated cross-flowing water stream
S.L. Fraenkel, L.A.H. Nogueira, J.A. Carvalho, Jr. and F.S. Costa	471	Heat transfer coefficients for drying in pulsating flows
G. Huelsz and E. Ramos	481	Power production in thermoacoustics
M. Mamou, M. Hasnaoui, A. Amahmid and P. Vasseur	491	Stability analysis of double diffusive convection in a vertical Brinkman porous enclosure
S.W. Ahn and K.C. Kim	501	Fully developed fluid flow and heat transfer in rough annuli
P.G. Tucker and C.A. Long	511	Fluid temperature distributions in a rotating cavity with an axial throughflow
M. Ohta and M. Suzuki	521	Numerical analysis of dispersed drop behavior in the pulsed sieve-plate extraction column
S. Srinivas Shastri and R.M. Allen	531	Method of lines and enthalpy method for solving moving boundary problems
N.M. Al-Najem, A.M. Osman, M.M. El-Refaee and K.M. Khanafer	541	Two dimensional steady-state inverse heat conduction problems
G.L. Morini, M. Spiga and P. Tartarini	551	Laminar viscous dissipation in rectangular ducts
A. Pantokratoras	561	Horizontal penetration of inclined thermal buoyant water jets
I.A. Hassanien	571	Boundary layer flow and heat transfer on a continuous accelerated sheet extruded in an ambient micropolar fluid
M. Ünsal	585	A solution for the complex eigenvalues and eigenfunctions of the periodic Graetz problem
C.Y. Wang	593	Onset of natural convection in a fluid-saturated porous medium inside a cylindrical enclosure bottom heated by constant flux

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1998 Volume 25, Number 5 July

Contents

H.A. Abdel-Aal and S.T. Smith	599	Thermal compatibility of metallic pairs in sliding contact
H.A. Abdel-Aal	609	On a method to deduce friction-induced temperatures from thermal strain measurements in the dry sliding of metallic pairs
M. Huq, A.M. Aziz-ul Huq and M.M. Rahman	619	Experimental measurements of heat transfer in an internally finned tube
K.W. Ng, Z.X. Gong and A.S. Mujumdar	631	Heat transfer in free convection-dominated melting of a phase change material in a horizontal annulus
A. Desseaux	641	Analytical and numerical solutions to a problem of convection in a porous media with lateral mass flux
G. Sgalari, G. Camera-Roda and F. Santarelli	651	Discrete ordinate method in the analysis of radiative transfer in photocatalytically reacting media
R.M. Saldanha da Gama and M.L. Martins-Costa	661	On the physical interpretation of the internal heat transfer coefficient in a solid-fluid mixture
Y. Demirel	671	Irreversibility distribution for a pure convection case of the Smith-Hutton problem
G.F. Melo, P.T. Lacava and J.A. Carvalho, Jr.	681	A case study of air enrichment in rotary kiln incineration
J.H. Jeong, R.J. Park and S.B. Kim	693	Visualization experiments of the two-phase flow inside a hemispherical gap
Y.K. Shen	701	Study on moving boundary problems of injection molding
I. Horuz	711	A comparison between ammonia-water and water-lithium bromide solutions in vapor absorption refrigeration systems
I.H. Tavman	723	Effective thermal conductivity of isotropic polymer composites
S. Tavman and I.H. Tavman	733	Measurement of effective thermal conductivity of wheat as a function of moisture content
S. Bhattacharyya, A. Pal and I. Pop	743	Unsteady mixed convection on a wedge in a porous medium

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1998 Volume 25, Number 6 August

Contents

A. Shoda, C.Y. Wang and P. Cheng	753	Simulation of constant pressure steam injection in a porous medium
S.M. Sami and B. Poirier	763	Two phase flow heat transfer of binary mixtures inside enhanced surface tubing
C.-Y. Cheng and C.-K. Chen	775	Transient response of annular fins subjected to constant base temperatures
I. Horuz, E. Kurem and R. Yamankaradeniz	787	Experimental and theoretical performance analysis of air-cooled plate-finned-tube evaporators
M. Mamou, A. Mahidjiba, P. Vasseur and L. Robillard	799	Onset of convection in an anisotropic porous medium heated from below by a constant heat flux
A. Campo and F. Rodriguez	809	Approximate analytic temperature solution for uniform annular fins by adapting the power series method
S. Wongwises and P. Naphon	819	Heat-mass transfer and flow characteristics of two-phase countercurrent annular flow in a vertical pipe
D.J. Lee	831	Stochastic simulation of non-hydrodynamic burnout on conductively heated surface
B.S. Yilbas, S.Z. Shuja and M. Sami	843	Pulsed laser heating of steel surfaces – Fourier and electron kinetic theory approaches
M.E.C. Oliveira and A.S. Franca	853	Simulation of oxygen mass transfer in aeration systems
M. Can	863	Simultaneous convective heat and mass transfer in impingement ink drying
B.A.K. Abu-Hijleh and W.N. Heilen	875	Correlation for laminar mixed convection from a rotating cylinder
R. Yamankaradeniz and I. Horuz	885	The theoretical and experimental investigation of the characteristics of solar-assisted heat pump for clear days
A.J. Chamkha	899	Unsteady hydromagnetic flow and heat transfer from a non-isothermal stretching sheet immersed in a porous medium

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1998 Volume 25, Number 7 October

Contents

S.C. Chen, Y.C. Chen, N.T. Cheng and M.-S. Huang	907	Simulation of injection-compression mold-filling process
H. Mhiri, S. El Golli, A. Berthon, G. Le Palec and P. Bournot	919	Numerical study of the thermal and aerodynamic insulation of a cavity with a vertical downstream air jet
S. Olek	929	Heat transfer in duct flow of non-Newtonian fluids with axial conduction
L.P. Chua, S.C. Tung and S.C.M. Yu	939	Measurements of jets: Prediction of the valvular lesion size and regurgitation
A. Ünal	949	Theoretical analysis of triple concentric-tube heat exchangers. Part 1: Mathematical modelling
K.A. Yih	959	Uniform lateral mass flux effect on natural convection of non-Newtonian fluids over a cone in porous media
A. Yiğit	969	The computer-based human thermal model
N. Guemouria, M. Prud'homme and T.H. Nguyen	979	Moving boundary flow and heat transfer in an anisotropic porous medium
Y.P. Chang, S.Y. Hu and S.C. Chen	989	Simulation of gas-assisted injection mold-cooling process using line source model approach for gas channel
M. Prud'homme and T.H. Nguyen	999	On the iterative regularization of inverse heat conduction problems by conjugate gradient method
E. Ruckenstein	1009	On the laminar and turbulent free convection heat transfer from a vertical plate over the entire range of Prandtl numbers
M.Z. Saghir	1019	Heat and mass transfer in a multi-porous cavity
M. Zhao, L. Robillard and P. Vasseur	1031	Mixed convection in a low rotation horizontal cylinder
R.V. Seeniraj, R. Velraj and N.P. Kannan	1041	Analytical solutions for planar and cylindrical axisymmetric melting with heat capacity effects of flowing stream and PCM

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1998 Volume 25, Number 8 November

Contents

L.P. Chua, T. Akamatsu and W.K. Chan	1055	Preliminary measurements of an enlarged blood pump model
R.-J. Park, S.-M. Choi, S.-B. Kim and H.-D. Kim	1065	Natural convection heat transfer of the low Prandtl number fluid with solidified layer formation
T.-Y. Wang	1075	The coupling of conduction with mixed convection of micropolar fluids past a vertical flat plate
I. Muraoka, F.M. Ramos and V.V. Vlassov	1085	Experimental and theoretical investigation of a capillary pumped loop with a porous element in the condenser
Y.-L. Lee, T.-H. Fang, Y.-M. Yang and J.-R. Maa	1095	The enhancement of dropwise condensation by wettability modification of solid surface
J.N.N. Quaresma and J.A. Lima	1105	Thermally developing turbulent flow of pseudoplastic fluids within circular tubes
H.-H. Lu, T.-C. Wu, Y.-M. Yang and J.-R. Maa	1115	Transient heat and mass transfer in a drop experiencing absorption with internal circulation
W.-T. Wu, Y.-M. Yang and J.-R. Maa	1127	Effect of surfactant additive on pool boiling of concentrated lithium bromide solution
B.A/K. Abu-Hijleh, I.N. Jadallah and E. Abu Nada	1135	Entropy generation due to natural convection from a horizontal isothermal cylinder in oil
K.A. Yih	1145	Coupled heat and mass transfer in mixed convection over a wedge with variable wall temperature and concentration in porous media: The entire regime
G. Degan, H. Beji, P. Vasseur and L. Robillard	1159	Effect of anisotropy on the development of convective boundary layer flow in porous media
W.W. Lin and D.J. Lee	1169	Boiling on plate fin and annular fin
C.K. Krishnaprakas	1181	Radiation heat transfer in a participating medium bounded by specular reflectors
O.O. Onyejekwe	1189	Solution of nonlinear transient conduction equation by a modified boundary integral procedure
